

Table 1: Chi-square tests for content-injection barrier distribution of GSE citations.

Country	Comparison	N	df	χ^2	p
US	Model	2,640	8	568.94	<.001
	Model (ruling)	614	8	143.98 [†]	<.001
	Model (opposition)	2,026	8	516.14	<.001
	Party group	7,998	4	1044.06	<.001
	Party group (GPT)	1,032	4	540.21 [†]	<.001
	Party group (Gemini)	4,204	4	387.29	<.001
	Party group (Claude)	2,762	4	350.79	<.001
	Persona	7,998	8	6.62	.579
	Persona (GPT)	1,032	8	7.32 [†]	.503
	Persona (Gemini)	4,204	8	5.61	.690
	Persona (Claude)	2,762	8	1.76	.988
	Party ideology	7,998	4	148.44	<.001
	Alignment	5,358	12	101.00	<.001
	Alignment (GPT)	727	12	14.25 [†]	.285
	Alignment (Gemini)	2,796	12	62.12	<.001
	Alignment (Claude)	1,835	12	58.50	<.001
JP	Model	4,604	8	574.80	<.001
	Model (ruling)	1,187	8	172.14	<.001
	Model (opposition)	3,417	8	423.15 [†]	<.001
	Party group	13,724	4	357.92	<.001
	Party group (GPT)	2,845	4	226.83 [†]	<.001
	Party group (Gemini)	7,084	4	92.28	<.001
	Party group (Claude)	3,795	4	48.67	<.001
	Persona	13,724	8	10.07	.260
	Persona (GPT)	2,845	8	11.78 [†]	.161
	Persona (Gemini)	7,084	8	5.76	.675
	Persona (Claude)	3,795	8	5.61	.690
	Party ideology	13,724	4	288.67	<.001
	Alignment	9,120	12	201.84	<.001
	Alignment (GPT)	1,914	12	63.21 [†]	<.001
	Alignment (Gemini)	4,689	12	124.81	<.001
	Alignment (Claude)	2,517	12	52.63 [†]	<.001

Notes. Comparison column: “Model” compares GPT vs Gemini vs Claude; “Party group” compares ruling vs opposition; “Persona” compares ign. vs high-conservative vs high-progressive; “Party ideology” compares conservative vs progressive; “Alignment” compares aligned vs opposed. Parenthesized model names indicate the comparison is restricted to that model. [†] indicates low expected cell counts (< 5); interpret with caution. Tests are reported without multiplicity adjustment. Observations are citation-level and may not be fully independent within a response.

	Alignment (Claude)	42,832	6	71.87	<.001	<.001	***

Notes. Comparison column: “Model” compares GPT vs Gemini vs Claude; “Party group” compares ruling vs opposition; “Persona” compares ign. vs high-conservative vs high-progressive; “Party ideology” compares conservative vs progressive; “Alignment” compares aligned vs opposed. Parenthesized model names indicate the comparison is restricted to that model. † indicates low expected cell counts (< 5); interpret with caution. Raw p-values and Holm-adjusted p-values (p_H) are both reported; significance stars are based on p_H . Observations are sentence-citation pairs and may not be fully independent within a response.
